The following points were discussed during the PBC:

Query/ Suggestions raised by M/s. BD Biosciences, and response of CSIR-IICT:

Query-1: Specifications Point no. 1: It was suggested to mention 100 mW laser power

Response: The specifications are generic and inclusion of 100mW laser power will make it very specific. This may hamper participation from multiple vendors. It is also noted that the present specs donot restrict BD Biosciences from participating. Hence the request was not considered.

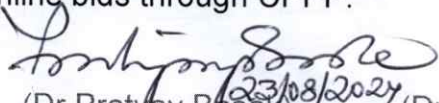

Query-2: Point no. 30: it was suggested to reduce the number of antibody kits and some of them may be included as optional items.

Response: It was clarified that all the antibody kits that are mentioned are of prime necessity by various users of the machine, and have to supplied as part of the main quote.
